## SOCIOMETRICS PROJECT NO. 54

**CONSTRUCTION OF A SYNTHETIC COMPARISON GROUP FOR THE COLE STREET YOUTH CLINIC STUDY IN SAN FRANCISCO, CALIFORNIA**

Under this contract, Sociometrics constructed a synthetic comparison group for a study being conducted by Harder + Company Community Research and the Cole Street Youth Clinic in San Francisco, California. Sociometrics provided the following deliverables:

- A variable-level matrix that compares those variables available in database archives with those being collected as part of the Cole Street Youth Clinic study;
- A set of frequencies associated with each of the variables from the different databases, along with frequencies of demographic characteristics; and
- A set of users guides for each of the databases used to gather this archival data.
