

# What is HIV RAP?

HIV RAP is a comprehensive library of research and prevention resources assembled in a single online collection. Developed in collaboration with the National Institutes of Health, these science-based resources offer you the information you need to know about, act on, and assess effective HIV prevention programs. (See reverse side for description of resources.)

## Specifically, HIV RAP can help you:

- Build your staff and client knowledge base about HIV/AIDS and how to prevent it (KNOW).
- Implement and culturally adapt effective HIV prevention programs (ACT).
- Determine your HIV prevention program needs/evaluate your program efforts (ASSESS).

## Why choose HIV RAP?

- HIV RAP offers a comprehensive one-stop shop for all your HIV prevention needs.
- HIV RAP offers 24/7 online access to resources (plus technical support).
- All resources are science-based, developed with funds from the National Institutes of Health and vetted by independent expert scholars.
- All resources have been tried and tested by professionals in the field.

## Who Uses HIV RAP?

- Social science and health science libraries.
- Health clinics, including Department of Health, student health, and prisons/jails.
- Community-based AIDS Service Organizations (ASOs).
- High school and college instructors and students.

## How to Order HIV RAP

For more information or to subscribe to HIV RAP, contact:

HIV RAP: HIV/AIDS Research And Prevention Library

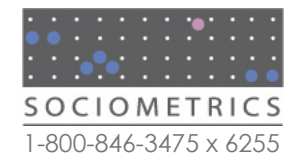

# HIV RAP

new online resource  
for practitioners  
and researchers

*"The information I obtained was invaluable."*  
Nurse Practitioner

*"The recommendation that other staff participate in future training offered was the best indication of what they thought about the training - they wanted to share the good experience!"*  
Connie Reitman,  
Executive Director,  
Inter-Tribal Council of  
California

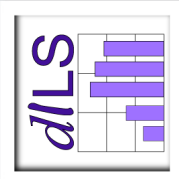

**Know**

**What Are The Resources?**

Promoting Education, Teaching, & Research on AIDS

The Data & Internet Literacy Series

**What Can I Do With The Resources?**

Learn science-based information about HIV / AIDS

Learn how to use data and the internet to understand research results

**What Are The Benefits?**

Increase your knowledge of the social and behavioral aspects of HIV/AIDS using these easy-to-navigate, easy-to-understand resource modules.

Understand data collection. Make sense of scientific articles. Develop your organization's online presence. Achieve fundraising goals using data and the Internet.

Tools for Building Culturally Competent HIV Prevention Programs

Replicate effective HIV / AIDS prevention programs

Provide a computer-based multimedia HIV prevention program for African American women.

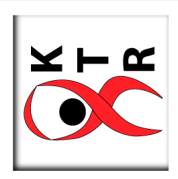

Build and implement culturally competent HIV prevention programs

Identify and replicate an effective HIV prevention program that meets your population's specific needs. Assess effectiveness with provided evaluation instruments.

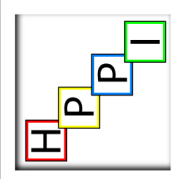

Create a positive learning environment for young African-American women using this interactive program that requires minimal staff time.

Understand culture and cultural competence and their connection to HIV. Conduct effective and culturally competent program planning, implementation, and evaluation.

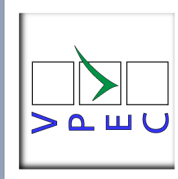

**Assess**

Know The Risks

HIV/AIDS Prevention Practitioner Institute

The Virtual Program Evaluation Consultant

Provide clients with a self-paced, multimedia HIV risk assessment and learning center

Increase capacity to plan, evaluate, and sustain effective HIV prevention programs

Evaluate HIV / AIDS prevention programs online

Empower patients to take a proactive interest in learning about HIV/AIDS prevention and other sexual health topics. Facilitate increased levels of HIV risk screening and discussion.

Develop a program model. Replicate and adapt effective programs. Understand process and outcome evaluation studies. Collect outcome data.

Create customized evaluation surveys. Access secure and confidential storage of data from self-administered online surveys.
