

SOCIOMETRICS PROJECT No. 14

CREATION OF THE MICROCOMPUTER VERSION OF THE 1984 NATIONAL HEALTH INTERVIEW SURVEY PERSONAL RECORD AND SURVEY ON AGING

This project, a follow-up to Project No. 12, produced: (1) a machine-readable microcomputer extract of the National Center for Health Statistics' 1984 National Health Interview Survey Personal Record and Survey on Aging; (2) machine-readable SPSS/PC and SAS/PC statements to read the raw data and create an SPSS/PC or SAS/PC analysis file; and (3) a printed user's guide and training manual to accompany the machine-readable files.

The project also investigated the market for microcomputer training packages keyed to specific applications in epidemiology textbooks.

Sponsor: The National Center for Health Statistics
 3700 East-West Highway
 Hyattsville, MD 20782
 (301) 436-7089

Purchase Order: 87A044432001D

Project Officer: Deborah Dawson

Duration: 06/04/87—05/31/88

Budget: \$20,000

Staff: J. J. Card, R. Goodrich, R. T. Reagan
