

SOCIOMETRICS PROJECT No. 40

UPDATING THE SOURCEBOOK OF COMPARISON DATA FOR EVALUATING ADOLESCENT PREGNANCY AND PARENTING PROGRAMS

This six-month project allowed Sociometrics to update the *Sourcebook of Comparison Data for Evaluating Adolescent Pregnancy and Parenting Programs*. This document presents tabular information on the prevalence and incidence of sexual-, contraceptive-, pregnancy-, childbearing-, and childrearing-related behaviors that can be used as comparison data for evaluations of teen pregnancy care and prevention programs. Instructions on how the tables can be used to conduct relatively inexpensive, cost-effective evaluations, along with illustrative case studies demonstrating such use, are included.
