

SOCIOMETRICS PROJECT No. 47

ESTABLISHING A STROKE DATA ARCHIVE PHASE I

This project explored the feasibility of establishing a Stroke Data Archive consisting of the best existing data from stroke registries and stroke prevention studies. It involved: (1) identification and recruitment of members of the Advisory Panel; (2) identification of candidate stroke databases and prevention studies meeting specified criteria for presentation to the Advisory Panel in Phase II; (3) preparation of briefing materials for data sets to be submitted to the Advisory Panel; (4) investigation of the feasibility of obtaining candidate data sets from the original investigators; (5) development of a draft list of stroke Topics and Types, and (6) development of a preliminary mailing list of those with potential interest in secondary analysis of stroke data.

Sponsor: National Institute of Neurological Disorders and Stroke (NINDS)
