

SOCIOMETRICS PROJECT No. 102

EVALUATION ASSISTANCE FOR DREW CHILD DEVELOPMENT CORPORATION

The Drew Child Development Corporation (DCDC) has been implementing the Postponing Sexual Involvement Curriculum as part of its efforts to prevent teen pregnancy. To monitor the program, the agency has administered a short post-test survey to program participants. Under this contract, Sociometrics performed data analyses to compare survey data from participating youths with data from surveys administered by DCDC to a convenience sample of non-participating youth. A brief write-up of analysis findings was sent, along with output tables, to DCDC.
